SUMMARY

iOS-first Tech Lead with 15+ years in mobile and backend engineering across fintech, ecommerce, and SaaS. At Smartbroker (300k users), took the app from **2.3 to 4.6 stars in 6 months**, rolled out DPoP authentication across 4 platforms, and cut release-blocking defects by **over 90%** while scaling AI-assisted development. Looking for Principal iOS Engineer and Tech Lead roles across Europe.

SKILLS

Languages & Frameworks: Swift, SwiftUI, UIKit, Combine, Core Data, Objective-C, Kotlin Multiplatform (KMP), Ruby on Rails

Architecture: Modular architecture, Clean Architecture, MVVM, VIPER, TDD, API security (DPoP, OAuth)

Delivery: Mobile DevOps, CI/CD, Fastlane, Xcode, REST, GraphQL, agentic engineering & AI-assisted workflows

Leadership: Technical direction, cross-platform ownership, mentoring, hiring, building teams from zero

EXPERIENCE

Tech Lead • Smartbroker
12/2023 – Present • Berlin, Germany

- Tech lead for a cross-platform team of **6 engineers**, owning technical direction for the Core domain across iOS, Android, Web, and Backend for **300k users**.
- Rolled out DPoP authentication platform-wide, closing token-replay attacks with no added friction for users, and consolidated **3 legacy backend services into 1**, cutting infrastructure costs by **20%**.
- Introduced a Merge Candidate workflow to contain the defect spike from AI-assisted development, cutting release-blocking QA defects by **over 90%** and restoring a normal release cadence.
- Modernized the architecture and adopted Mobile DevOps practices, cutting merge cycle time by **40%**.

Mobile Team Lead • Smartbroker
04/2022 – 12/2023 • Berlin, Germany

- Tech lead for a team of **5 iOS engineers**; raised the App Store rating from **2.3 to 4.6 stars in 6 months** by prioritizing fixes from customer feedback.
- Designed and launched a modular mobile platform architecture, adopted across iOS and Android within the **first 8 months**.
- Built mobile infrastructure from zero, including **6 on-premise Mac minis** for CI, enabling daily builds to QA.
- Built Core domain SDKs adopted by **4 internal teams**, speeding up their delivery.

Lead Mobile Engineer • NA-KD
07/2021 – 03/2022 • Remote

- Built NA-KD's in-house mobile engineering function from scratch, hiring its first engineers and setting its technical direction.
- Split a monolithic app into **13 modules** and doubled release frequency from bi-weekly to **weekly** without pausing feature delivery.

Mobile Team Lead • Verimi
01/2020 – 06/2021 • Berlin, Germany

- Inherited a legacy identity app with **4 production incidents a month**; led a full re-architecture on iOS and Android that brought incidents down to **fewer than 1 every 2 months**.
- Fixed memory leaks and added lazy loading, cutting the crash rate by **88%** and improving cold-launch time.

Senior Developer • Zalando SE
01/2019 – 12/2019 • Berlin, Germany

- Built a custom Go CLI to migrate **40 TB of merchant data**, completing the Merchant Platform transition with **zero downtime**.
- Integrated Keycloak authentication and built PDF services in Scala Play and Spring Boot, cutting on-call incidents from **weekly to once every 3 months**.
- Built the mobile foundation for the Merchant Operations 2020 initiative, coordinating dependencies across **6 internal teams**.

iOS Developer • **Zalando SE**
01/2016 – 12/2018 • Berlin, Germany

- Helped launch Zalando Beauty in **2 months** and built the Movmnt iOS app.

iOS Developer • **Shopbox ApS**
02/2015 – 12/2015 • Copenhagen, Denmark

- As the sole iOS developer, shipped the company's core product, an iOS point-of-sale app, in **3 months** (vs. a 6-month estimate).
- Visited merchants on-site to observe how the app was used and fed that into the product, helping grow the customer base from **2 to 200 merchants in 10 months**.

Various Engineering Roles • **Startups & Agencies**
2005 – 2014 • Cairo, Egypt & Remote

- Delivered mobile, web, and backend systems for clients including Pfizer, telecom operators, and an enterprise hospital.

EDUCATION

BSc. Computer Science
Cairo University • Egypt

LANGUAGES

Arabic (Native) • English (C1) • German (B1)

PROJECTS

Storiapod — storiapod.com • Side project, engineering lead
Immersive Arabic audio stories and drama platform built with content creators, serving **10,000+ users**. Lead engineering end to end: native iOS and Android apps on a shared Kotlin Multiplatform core, backed by Ruby on Rails.
