### SUMMARY

Tech Lead and domain owner with 15+ years in mobile and backend engineering across fintech, ecommerce, and SaaS. At Smartbroker, a BaFin-regulated brokerage with 300k users, I own the Core domain end to end across iOS, Android, Web, and Backend: roadmap, architecture, security, and quality. Took the app from **2.3 to 4.6 stars in 6 months**, rolled out DPoP authentication across 4 platforms, and cut release-blocking defects by **over 90%**. Ship-it mindset: pragmatic decisions, fast and safe delivery.

### SKILLS

**Languages & Frameworks:** Swift, SwiftUI, UIKit, Combine, Core Data, Objective-C, Kotlin Multiplatform (KMP), Ruby on Rails

**Architecture:** Modular architecture, Clean Architecture, MVVM, VIPER, TDD

**Ownership & Quality:** ADRs, technical roadmap, tech debt management, test quality gates, monitoring & alerting

**Security & Compliance:** DPoP, OAuth, threat modeling, dependency scanning, secrets management, GDPR, DORA (EU), BaFin requirements

**Delivery:** Mobile DevOps, CI/CD, Fastlane, Xcode, REST, GraphQL, agentic engineering & AI-assisted workflows

**Leadership:** Technical direction, cross-platform ownership, mentoring, hiring, building teams from zero

### EXPERIENCE

**Tech Lead • Smartbroker**
12/2023 – Present • Berlin, Germany

- Own the Core domain across iOS, Android, Web, and Backend for **300k users**: 6–12 month technical roadmap aligned with product, architecture decisions documented as ADRs, and technical point of contact for POs and other teams; lead **6 engineers**.
- Lead security for a BaFin-regulated domain: rolled out DPoP authentication platform-wide to close token-replay attacks with no added user friction; introduced regular dependency scanning with fast patching of critical findings; mapped GDPR and DORA requirements to logging and data retention.
- Ran a make-or-buy and deprecation review that consolidated **3 legacy backend services into 1**, retiring end-of-life stack and cutting infrastructure costs by **20%**.
- Introduced a Merge Candidate workflow with automated quality gates to contain the defect spike from AI-assisted development, cutting release-blocking defects by **over 90%** and restoring a normal release cadence.
- Modernized the architecture and adopted Mobile DevOps practices, cutting merge cycle time by **40%**.
- Kept the domain's bus factor above 1 through pairing and documentation; identified skill gaps and drove hiring.

**Mobile Team Lead • Smartbroker**
04/2022 – 12/2023 • Berlin, Germany

- Guided a team of **5 iOS engineers**; raised the App Store rating from **2.3 to 4.6 stars in 6 months** by prioritizing fixes from customer feedback.
- Designed and launched a modular mobile platform architecture, adopted across iOS and Android within the **first 8 months**.
- Set up mobile infrastructure from zero, including **6 on-premises Mac minis** for CI, enabling daily builds to QA and keeping the pipeline green as top priority.
- Created Core domain SDKs adopted by **4 internal teams**, speeding up their delivery.

**Lead Mobile Engineer • NA-KD**
07/2021 – 03/2022 • Remote

- Established NA-KD's in-house mobile engineering function from scratch, hiring its first engineers and setting its technical direction.

- Split a monolithic app into **13 modules** and doubled release frequency from bi-weekly to **weekly** without pausing feature delivery.

**Mobile Team Lead** • **Verimi**
01/2020 – 06/2021 • Berlin, Germany

- Inherited a legacy identity app with **4 production incidents a month**; led a full re-architecture on iOS and Android that brought incidents down to **fewer than 1 every 2 months**.
- Fixed memory leaks and added lazy loading, cutting the crash rate by **88%** and improving cold-launch time.

**Senior Developer** • **Zalando SE**
01/2019 – 12/2019 • Berlin, Germany

- Planned and executed a zero-downtime migration with a custom Go CLI, moving **40 TB of merchant data** to complete the Merchant Platform transition.
- Integrated Keycloak authentication and built PDF services in Scala Play and Spring Boot, cutting on-call incidents from **weekly to once every 3 months**.
- Laid the mobile foundation for the Merchant Operations 2020 initiative, coordinating dependencies across **6 internal teams**.

**iOS Developer** • **Zalando SE**
01/2016 – 12/2018 • Berlin, Germany

- Helped launch Zalando Beauty in **2 months** and developed the Movmnt iOS app.

**iOS Developer** • **Shopbox ApS**
02/2015 – 12/2015 • Copenhagen, Denmark

- As the sole iOS developer, shipped the company's core product, an iOS point-of-sale app, in **3 months** (vs. a 6-month estimate).
- Visited merchants on-site to observe how the app was used and turned those observations into product improvements, helping grow the customer base from **2 to 200 merchants in 10 months**.

**Various Engineering Roles** • **Startups & Agencies**
2005 – 2014 • Cairo, Egypt & Remote

- Delivered mobile, web, and backend systems for clients including Pfizer, telecom operators, and a large hospital, mentoring **2 junior developers**.

## EDUCATION

**BSc Computer Science**
**Cairo University** • Egypt

## LANGUAGES

Arabic (Native) • English (C1) • German (B1)

## PROJECTS

**Storiapod** — storiapod.com • Side project, engineering lead
Immersive Arabic audio stories and drama platform built with content creators, serving **10,000+ users**. Lead engineering end to end: native iOS and Android apps on a shared Kotlin Multiplatform core, backed by Ruby on Rails.
